Hamilton Engineering, Inc. Adds Drilling Fluid Management Services

Houston, TX May 1, 2007 – Hamilton Engineering Inc. (“HEI”), a petroleum industry leader in drilling solutions, is pleased today to announce the addition of drilling fluid management services. HEI will provide Drilling Fluid Advisors with experience in drilling fluid programs, product pricing, solids control, waste management, regulatory compliance, and trouble avoidance and Drilling Fluid Technicians with experience in rig-site reporting, environmental compliance, hydraulics, hole cleaning, ECD management, and swab & surge. Joe Barnes, formerly of Triton Engineering and with 30+ years of experience in the drilling fluids business, will lead HEI’s service delivery and be available for individual consulting.

Mr. Charles R (Chuck) Brown, CEO/President of HEI said, "With the experience and expertise that Joe Barnes has in the drilling fluids business, HEI is better equipped to help our clients effectively drill wells, control their drilling fluid cost and avoid fluid related drilling problems. Additionally, Hamilton’s worldwide client base and strong business development team will ensure that our drilling fluids professionals are consistently engaged in the most challenging opportunities available in the industry."

HAMILTON ENGINEERING, INC., founded in 1976, historically specializes in the planning and supervision of petroleum related drilling, completion, and well workovers. HAMILTON's expertise in performing detailed well planning offers the key to low cost results in each phase of drilling program execution. Today, it is a full-service firm offering drilling, fluids management, completion, production, reservoir engineering and geoscience consulting and full-time placement services.
